Education

Indian Institute of Information Technology Bhagalpur

Bachelor of Technology in Computer Science and Engineering

Aug 2023 – Jul 2027 (Expected)

Bhagalpur, Bihar

- CGPA: 8.36/10.0 | Latest SGPA: 9.48/10.0

Rani Laxmi Bai Memorial

Class 12 (CBSE)

2022 – 2023

Lucknow, Uttar Pradesh

- Percentage: 92%

Career Convent College

Class 10 (ICSE)

2020 – 2021

Lucknow, Uttar Pradesh

- Percentage: 96%

Skills

Languages: C++, JavaScript, Dart, SQL, C

Frameworks & Libraries: Node.js, Express.js, Flutter

Backend & Databases: MongoDB, Firebase, Cloudinary, REST API

Developer Tools: Git, GitHub, VS Code, Android Studio, Postman, Figma

Core Competencies: Data Structures, Algorithms, OOP, DBMS, Agile Development

Experience

Thyright Innovations

Software Developer Intern (Flutter)

Aug 2025 – Nov 2025

Remote

- Migrated app architecture from **MVVM to Clean Architecture** in **Thyverse**, a production-level healthcare app, improving codebase scalability and separation of concerns across 10+ features.
- Implemented **REST API** integrations between Flutter frontend and cloud-based backend services, handling authentication and data flow across core modules.
- Collaborated in an **Agile** team to design, test, and deploy **10+ scalable features**, contributing to both frontend development and architectural decisions.

Projects

Prodloo | Flutter, Firebase, Analytics | Productivity Mobile Application

Dec 2025 – Present

- Built and **independently shipped** a productivity mobile application on **Google Play**, enabling users to systemize routines and track daily execution.
- Designed **premium UI/UX** with a refined dark theme using **Flutter**, focused on clarity, consistency, and long-term usability across all screen sizes.
- Implemented **productivity analytics** with a **7-day activity graph**, giving users visual insights into their daily execution patterns.

Amazin App | Flutter, Node.js, Express.js, MongoDB, Cloudinary | GitHub

Aug 2025

- Architected and developed a **full-stack e-commerce platform** with role-based access for admin and user panels, handling end-to-end product, order, and user management.
- Designed and deployed **secure RESTful APIs** using **Node.js** and **Express.js** with **JWT authentication** and **MongoDB**, supporting scalable data operations.
- Integrated **Google Pay** payment gateway and **Cloudinary** CDN for optimized media storage and delivery.

Leadership & Activities

- **Hackathon Finalist, Smart India Hackathon '24:** Led a team to secure a top 16 finish among 50+ teams by developing a farmer market-access app prototype.

Achievements

- **Problem Solving:** Solved **500+** DSA problems across platforms including 250+ on [LeetCode](#), covering graphs, trees, dynamic programming, and greedy algorithms.
- **Competitive Programming:** Achieved a **2-Star** rating on CodeChef (Handle: [fkwarrior21](#)), reaching a peak global rank of **528**.
